Dear Steve,

Attached is a copy of the note I wrote to Mike concerning the S&T program. For the most part, I believe the memo is still accurate.

I must stress that this note covers only the areas of S&T in which there should be a strong coordination between S&T and C.A. I say this because I believe Helmut did not appreciate my analysis last October.

If S&T could give a Tom Borelli style presentation, I think we would be well on our way.

Gerard
